

Budget

I will undertake all programming and web development, and have not included my time in the costings below.

To support the project I have budgeted for a dedicated server and backup drive (my current collection of servers are all hosting other projects), costs of submitting a paper to the PLoS One journal, and travel to MBL to discuss integrating the taxonomic name - literature mapping into EOL. Costs are in \$US. Hardware costs are based on UK prices converted to US exchange rate.

Mac Pro Server 16GB Ram 2x1TB disks 2 quad-core processors	6000
Lacie 4TB hard drive	750
Open Access publication fee (PLoS One)	1350
Travel and accommodation for visit to Woods Hole	2000
Total (\$US)	10000
