

Roderic Page

Professor of Taxonomy

rdmpage@gmail.com

Summary

My research interests include systematics, molecular evolution, bioinformatics, software development, host-parasite cospeciation, genomics, biodiversity informatics, and the Semantic Web.

Specialties

Software and web development.

Experience

Member of Steering Group at Public Library of Science

August 2010 - Present (1 year 10 months)

Member of Steering Group for the PLoS Biodiversity Hub

Trustee at M.L. MacIntyre Begonia Trust

April 2009 - Present (3 years 2 months)

Professor of Taxonomy at University of Glasgow

2003 - Present (9 years)

Senior Advisory Board member at NESCent (National Evolutionary Synthesis Center)

2007 - 2009 (2 years)

Editor in Chief at Systematic Biology

January 2004 - December 2007 (4 years)

Editor of the journal Systematic Biology, responsible for recruiting Associate Editors, assigning manuscripts to Associate Editors, final decisions on manuscripts. Helped with cover design. Systematic Biology is published by the Society of Systematic Biologists.

External Examiner at Imperial College London

January 2003 - December 2006 (4 years)

External examiner for MRes in Biosystematics course

Reader in Zoology at University of Glasgow

September 1999 - August 2003 (4 years)

Lecturer in Zoology at University of Glasgow

September 1995 - September 1999 (4 years 1 month)

Lecturer in Zoology at University of Oxford

October 1993 - August 1995 (1 year 11 months)

Stipendary Lecturer at Lady Margaret Hall, Oxford

October 1993 - August 1995 (1 year 11 months)

Postdoc at The Natural History Museum

July 1991 - September 1993 (2 years 3 months)

Thorne Research Fellow at American Museum of Natural History

July 1990 - June 1991 (1 year)

Skills & Expertise

Biodiversity informatics

Data Integration

Phyloinformatics

Software Development

Web Services

Education

University of Auckland

1982 - 1990

Honors and Awards

Linnaean Society of London Bicentennial Medal 1998

Interests

Semantic Web, biodiversity informatics, social networks, software, evolution, biology, bioinformatics
